

Studio Controls

Every control in the drawing studio — 54 of them — for mouse and keyboard, touch and gamepad. Start with the **14 essentials**; switch to Everything when you want the rest.

Heads up — these are the **default** shortcuts. In-game you can rebind the tool and view keys: open **Controls** (the ? button) and tap a shortcut with a pencil on it. The rest are fixed, because they share keys with another action.

**Tools**

6

**Brush**
Paint freehand strokes

B

Drag

1 finger

A

**Eraser**
Rub pixels away

E

Drag

1 finger
